# How you might be using Microsoft office on your computers now...

- Word for WordProcessing

- PowerPoint for SlideShows

- Excel for calculations

- Publisher for brochures and Posters

Perhaps you could use it like this...

Press  
Ctrl K

It can be interactive

You can hyperlink text to open up other documents or websites.

Instead of printing out a Worksheet, make it interactive with the hyperlinks

Hyperlink to websites that have the information students need.

Hyperlink to other files like an Inspiration Mindmaps, PowerPoint or an Excel sheet.

How do you hyperlink?

Highlight the text and click on the hyperlink button on the toolbar.

Navigate to where the file is saved or paste in the internet address.

## Fact or Opinion

### Global Warming

The internet is full of information but we only want the information that answers our questions and we want that information to be accurate and real.  
Follow these steps and develop your Fact and Opinion skills.

1. Read Chapter One 'Turning up the heat'
2. What statement on that page could you use the internet for to check its accuracy?

*Statement:*

**Try this site and check the accuracy**  
**[John Hopkins School of Public Health](#)**

3. Click on the following two sites and skim read the information

United States Environmental Protection Agency

<http://www.epa.gov/globalwarming/kids/gw.html>

Global Warming Fact or Fiction

[http://www2.corvallis.k12.or.us/cheldelin/gunnj/Global\\_Warming/index.htm](http://www2.corvallis.k12.or.us/cheldelin/gunnj/Global_Warming/index.htm)

4. One of these sites is factual and one sounds factual but is opinion. Which one is which and why did you make that choice?

5. Click on this link to take you to [Fact or Opinion Chart](#)

Revisit those sites and answer the Fact or Opinion questions. Were you correct in choosing between the 2 previous sites?

# Set homework and make it available online

There are two well known sites that will open up Word documents

Google Documents

<http://docs.google.com>

Zoho

<http://zoho.com>

Upload your homework to Google Docs or Zoho

Hyperlink to websites

Download to Open Office or Word  
Shared to their own account  
Collaborative document

When finished it can be emailed to teacher

**Keywords, Skimming and Scanning**

**Tsunami! Wave of Destruction by Wendy MacDonald**

Read **Pages 2 to 7** of 'Tsunami! Wave of Destruction'

Your question is 'Why do you think the wave slows down in shallow water?'

Find key words as you read the text and add them to the [Tsunami keyword diagram](#).  
<http://mywebspiration.com/launch.php>

What are your most important keywords?

*In this activity we are going to look at a website that will help you to answer your question. You are going to use your keywords, find sentences that answer the question, copy those sentences, paste them into the Internet information box, highlight and colour the keywords that answer your question and then write your own answer using the keywords as a guide.*

Open the Inspiration 'Tsunami Waves' diagram  
Enter the keywords into the yellow keyword boxes

# Scientific Report

Cirrus Clouds

General Statement

The clouds are very high up in the sky and can look wispy or feathery. There is no rain with these clouds.

Scientific description

High level clouds that are often thin and wispy. Typically found at heights greater than 6000 metres. They are composed of ice crystals that come from the freezing of highly cooled water droplets.

Description

Description

Description

You see this clouds in fair weather. They are the indicators of fine weather. Generally they are thin and white but can display amazing colours in a sunset.

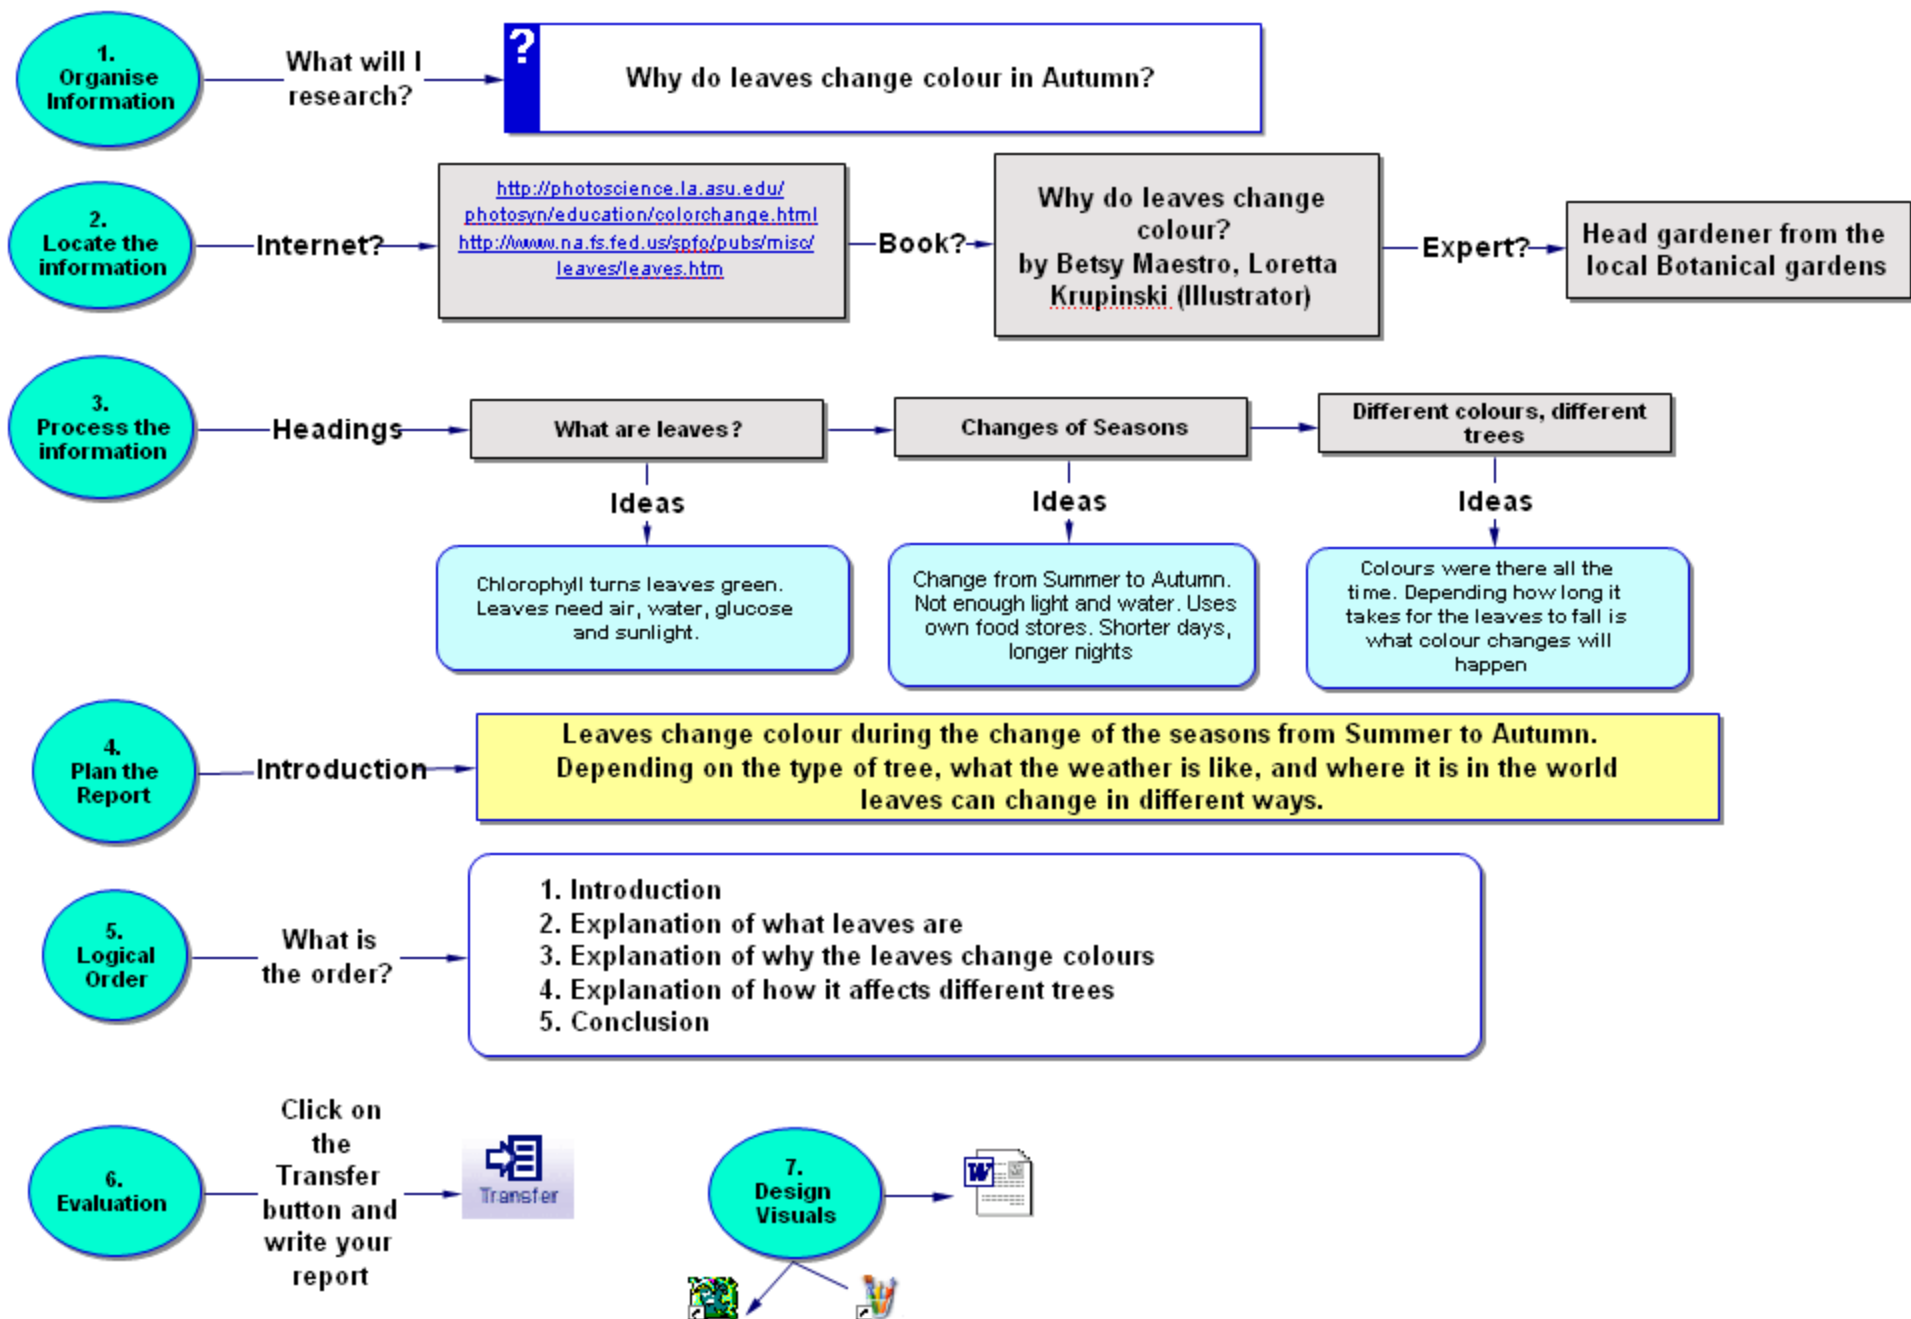

Can be transparent. Comes from a Latin word for tuft of hair or a curl. So thin that the sun can pass right through them.

Made of ice particles. More extensive cirrus clouds are associated with an approaching warm front.

Summary

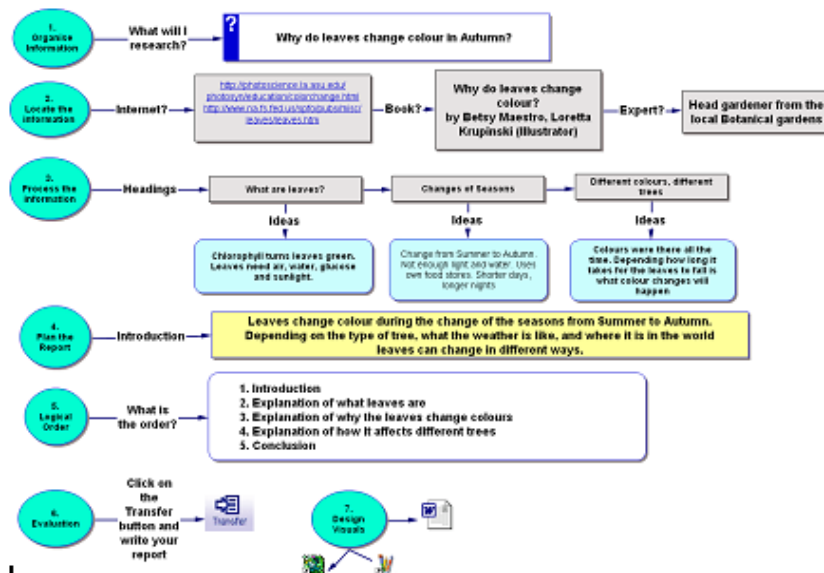

These clouds are generally associated with fine weather and the heavier they are the more likelihood of a warm front which causes humidity. They are very high in the sky and that is why they are made of ice crystals.

## Why do leaves change colour in autumn?

### Introduction

Leaves change colour during the change of the seasons from summer to autumn. Depending on the type of tree, what the weather is like, and where it is in the world leaves can change in different ways.

### What are leaves?

Leaves are an above the ground plant. They store water and food for the rest of the plant. Plants take water from the ground through their roots. They take a gas called carbon dioxide from the air. Plants use sunlight to turn water and carbon dioxide into glucose which is a kind of sugar. Plants use glucose as food for energy and as a building block for growing. The way plants turn water and carbon dioxide into sugar is called photosynthesis. That means "putting together with light." A chemical called chlorophyll helps make photosynthesis happen. Chlorophyll is what gives plants their green color.

Digital and non digital encyclopaedias

Videos and DVDs

Museum

**L**

Some scientists say that the food ran out as the dinosaurs were so big so the plant eaters died and then when they were gone the meat eaters had nothing to eat.

Other scientists believe that the earth was hit by a huge asteroid that blocked out the sun and caused volcanoes to erupt and earthquakes. Because the sun was blocked no plants were able to grow and the dinosaurs died of starvation.

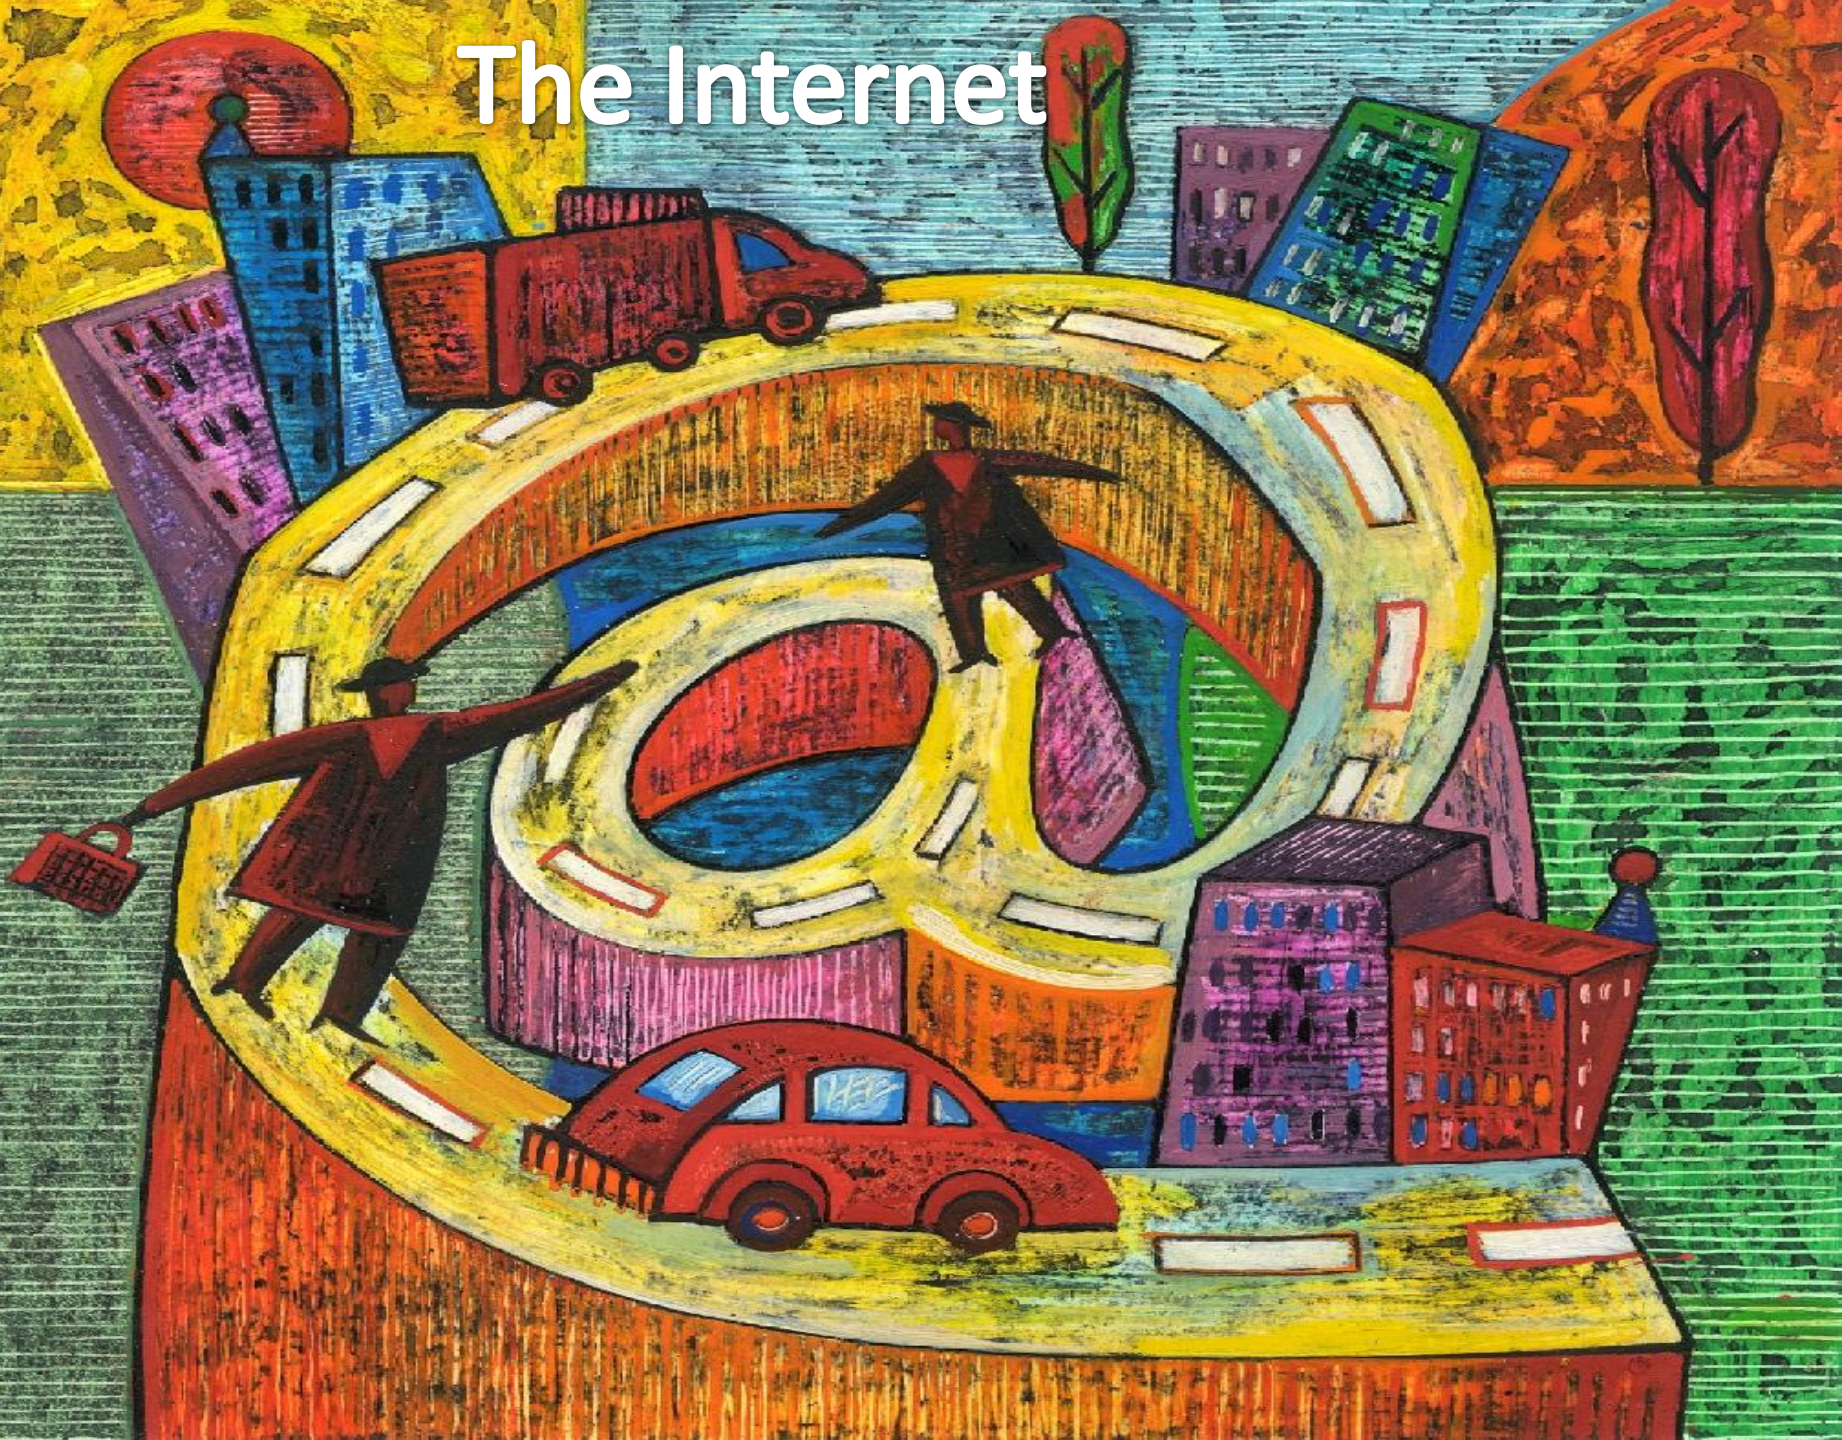

Scientists believe that some birds are descended from Theropod dinosaurs

Different types of dinosaurs lived at different periods. They were not all there together.

Dinosaurs were around for 165 million years, humans have only been around for a million.

# The Internet

# Cybersafety GUIDELINES

TEXTSPACE.NET

## Ministry Guidelines for the online Publication of Student Images and School Work

Ministry Guidelines You must ensure that you have ICT AUP (Information and Communication Technology Acceptable Use Policy) agreements in place for both Students and Teachers Within that agreement are the clauses asking for permission to publish

- student/teacher work (Parents/Caregivers will sign on behalf of the child)
- student/teacher photos (Parents/Caregivers will sign on behalf of the child)
- first names

It is not practical to obtain authorisation from a student's parents every time the school wishes to publish a photo featuring the student on its website. It is probably sufficient to have one authorisation for each student in the school that covers the entire period the student is enrolled at the school. This could be obtained either when a student first enrolls at the school or when the issue arises for the first time with a particular student. The authorisation form should be accompanied by the school's policy on privacy and the publication of information on the Internet.

## The need to consider the Privacy Act 1993

TKI Link to Privacy Act Internet websites can be accessed by anyone with an online connection. Material published is effectively made available to the world at large. In recognition of this, schools should take steps to safeguard the privacy of their students and to comply with the Privacy Act 1993 when publishing online.

The Privacy Act defines "personal information" as any information about an "identifiable individual". The Privacy Act does not cover information that does not identify any specific individuals.

A student's drawing or story alone is not personal information about a student and therefore is not covered by the Privacy Act. However, if the drawing or story is accompanied by any information that identifies the student, such as their name, age, and school, then the whole work may become personal information that is covered by the Privacy Act. Even if the work is not accompanied by information that identifies the student, the content of the work may mean that it is capable of identifying the student and as a result, the work may be personal information under the Privacy Act, for example, a self-portrait or a story about the student's family.

Photographs of a student are personal information about that student and are covered by the Privacy Act.

# Wikis and Blogs

<http://wheretostartwithwikisandblogs.wikispaces.com/#toc0>

# Students and Blogs

- Are Personal journaling rather than blogging
- Journaling: account of the days events or feelings

## THE DIFFERENCE IS

- Blogging: process of thinking in words
  - Promotes critical and analytical thinking
  - Promoter of creative, intuitive, and associational thinking

If you don't have a Google Account (Gmail)

Go to <https://www.google.com/accounts/NewAccount>

- Type in your email address
- Type in a password (8 characters letters and/or numbers)
- Retype password
- Type the letters in the Word Verification box
- Click on **I accept. Create my account**

Create a Google Account

### Create an Account

If you already have a Google Account, you can [sign in here](#).

#### Required information for Google account

Your current email address:   
e.g. myname@example.com. This will be used to sign-in to your account.

Choose a password:  [Password strength](#)  
Minimum of 8 characters in length.

Re-enter password:

☒ Remember me on this computer.

Creating a Google Account will enable Web History. Web History is a feature that will provide you with a more personalized experience on Google that includes more relevant search results and recommendations. [Learn More](#)

☒ Enable Web History.

#### Default Homepage

☐ Set Google as my default homepage.  
Your default homepage in your browser is the first page that appears when you open your browser.

Location:

Word Verification: Type the characters you see in the picture below.

  
Letters are not case-sensitive

Terms of Service: Please check the Google Account information you've entered above (feel free to change anything you like), and review the Terms of Service below.

[Printable Version](#)

Google Terms of Service

Welcome to Google!

1. Your relationship with Google

By clicking on 'I accept' below you are agreeing to the [Terms of Service](#) above and the [Privacy Policy](#).

**I accept. Create my account.**

# Why would you use a blog?

## Personal blog

- Reflection on your own teaching experience
- Explain teaching insights
- Share ideas for activities or games
- Create '**How to's**'
- Explore important teaching and learning issues

## Classroom

- Post class related information
- Post assignments
- Communicate with parents
- Provide examples of class work
- Post activities or games
- Post internet resources
- Publish examples of good work
- Create a literature circle inviting students to participate
- Class newsletter
- Link with another class

# Wikis as a Communication Forum

## Why have a wiki?

- Each student can have a page
- Many online publishing tools can be embedded into a wiki
- Whole class work can be viewed
- Online viewing by others
- Visual

## Class Wikis

- <http://mags13history.wikispaces.com>
- <http://finkspace.wikispaces.com/>

## Auckland Zoo

Help

4

A detailed map of the San Diego Zoo grounds. The map is filled with green spaces representing lawns and trees, and blue areas representing water features like Central Lake and various ponds. Numerous circular icons are scattered across the map, each containing a stylized illustration of a different animal species, such as birds, mammals, reptiles, and amphibians. These icons are color-coded: red/pink for mammals, blue for birds, yellow for reptiles/amphibians, and green for other animals. Labels in white text identify specific zones: "Tropical Rainforest" at the top left, "Tiger Territory" on the middle left, "Central Lake" in the center, and "Jungle Junction Primate Trail" on the bottom right. Other smaller labels include "Pond", "Fountain Plaza", "Carnegie", and "Duke's Garden". A small inset map in the bottom left corner shows the zoo's location relative to the city of San Diego, with a red dot marking the entrance.
